- This document has been prepared by NOVONIX Limited (“the Company” or “NOVONIX”). No representation, expressed or implied, or warranty as to the accuracy or completeness of the information contained herein is made by any party and nothing contained herein shall be relied upon as a promise or representation as to the future. In all cases, recipients should conduct their own investigation and analysis of NOVONIX.
- This presentation, including the information contained in this disclaimer is not a prospectus, disclosure document, product disclosure statement or other offering document under Australian law or under any other law. It is for information purposes only and does not constitute an offer, invitation or recommendation to subscribe for or purchase any security and neither the presentation, disclaimer nor anything contained in them forms the basis of any contract or commitment. This presentation does not take into account your individual investment objectives, financial situation or particular needs. You must not act on the basis of any matter contained in this presentation, but must make your own assessment of the Company.
- All statements in this presentation, other than statements of historical facts, which address the future activities and events or developments that the Company expects to occur, are forward looking statements. Although the Company believes the expectations expressed in such statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those in forward-looking statements.
- Forward-looking statements involve and are subject to known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company and/or its subsidiaries to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include, among others, general business, economic, competitive, political and social uncertainties; the actual results of current activities; assumptions in economic valuations which prove to be inaccurate; possible variations product performance and reliability; climate events; political and regulatory changes; delays in obtaining approvals or financing or in the completion of development or construction activities.
- To the maximum extent permitted by law, none of NOVONIX or its related corporations, directors, employees or agents, nor any other person, accepts any liability, including, without limitation, any liability arising from fault or negligence, for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it. Recipients should make their own enquiries in relation to any investment decisions.
- Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. Forward-looking information contained herein is current as at the date of this presentation and the Company disclaims any obligation to update any forward-looking information, whether as a result of new information, future events or results otherwise. There can be no assurance that forward-looking information or statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information or statements. Accordingly, readers should not place undue reliance on forward-looking statements.
- This announcement has been authorised for release to the ASX by the Managing Director, Philip St Baker.

Commercializing PUREgraphite

SAMSUNG Supply Agreement and R&D Collaboration

- Initial supply of 500 tons commencing 2020
- Working toward longer term supply agreement
- R&D collaboration agreement on new materials
- Conditional on supplier audit and QA
- First North American Co to break into the market

SANYO Commercial Collaboration

- MOU to continue to assess anode materials & supply for EV & ESS following positive test results in Japan

PUREgraphite facility (USA) – under construction

**now
commissioning**

October - December 2019

- Signed a Supply Agreement and R&D Collaboration with SAMSUNG SDI (S.Korea)
- Continued material evaluation with SANYO (Japan)
- Installation of particle blending, sizing and shaping systems and commencement of commissioning
- Installation of particle coatings and thermal treatments systems and commencement of commissioning
- Set-up of comprehensive laboratory suitable for commercial production and quality assurance
- Fabrication and 80% installation of re-engineered furnace cooling systems and back-up power and water systems
- Expansion of production team for commercial operations and associated recruitment, induction and training

Cell line R&D services on track for \$2m sales in first full year

- Battery cell pilot line and R&D laboratories set up in FY19
- External demand for these services has been overwhelming
- Sales in the first half FY20 have exceeded \$1m

**R&D
services**

R&D technologies & services now funding our technology incubator

- Battery R&D services rapidly growing from \$200k in FY2019 to >\$2m in FY2020
- Sales and services from HPC & DTA testing tech forecast >\$2m in FY2020
- Above funds NOVONIX's battery technology development program (incubator) including Dalhousie University partnership collectively delivering a steady stream of inventions including new anode & cathode materials, electrolytes and manufacturing methods

January 2020

ASX: NVX

**self-funded
tech
incubator**

October - December 2019

- Named winner of the Award for Innovation at the 17th Annual Discovery Awards in Halifax, Canada
- Rapid growth of our battery R&D services business
- Steady sales for our battery testing equipment business
- Published papers on our DTA and HPC technologies
- Advanced R&D on new cathode materials and manufacturing methods with a patent file pending
- Ongoing R&D support to PUREgraphite for slurry, electrode and cell making and cell testing
- Delivery of custom state-of-the-art battery cell testing technology and systems for a global consumer electronics company
- Continued growth of our tier 1 customer base with new global automakers and OEMs becoming customers

Technical experience:

technology & delivery

- **Manufacturer of battery anode material (PUREgraphite)**

- US-made Premium high capacity long-life graphite anode
- Sales agreement with Samsung SDI (Korea)
- MOU agreement with SANYO (Japan) towards future supply
- Commercial production commencing Q1 2020

- **Supplier of battery technology solutions (BTS)**

- Technology accelerates R&D from years to weeks
- Battery material R&D partnership with Dalhousie University
- Battery testing, design, and prototyping services
- Sales to battery & OEM multinationals in 15 countries

battery technology & materials Co
